

5 STEPS FOR STARTING UP A PPE CHAPTER AT YOUR UNIVERSITY!

Congratulations! You've taken the first step toward starting up a PPE chapter at your university. You have committed to support the statewide efforts set forth by the Delaware Healthy Mother & Infant Consortium (DHMIC) and the Division of Public Health (DPH).

Our vision for Delaware is to have a PPE program at every college and university across the state. Together, as partners, we will work to improve the health of children and women of childbearing age as well as decrease the rate of health disparities.

Complete Comprehensive Training

Colleges and universities who choose to participate in the program will receive curriculum and training materials along with materials for use in campus and community outreach efforts. The basic PPE training or Level 1 training focuses on the curriculum: preconception health and the reduction of infant mortality. Faculty Advisor

Program sites require a faculty advisor to oversee all PPE program activities. Faculty advisors will work with DHMIC's Women, Infants & Families nurse consultant to track and report all outreach activities.

Annual PPE Learning Collaborative

Network with other PPEs from colleges and universities throughout the state! This one-day mandatory interactive learning collaborative features guest expert lecturers from our public health hospital, as well as community partners. Share your chapter's outreach success stories. There is food and fun for everyone!

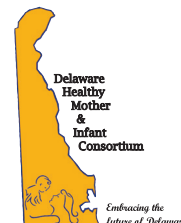

Outreach and Education for Your College Peers

Participate in one recruitment event, one training event, two campus activities, and one community activity. When you do your part to educate and learn from your peers, you are taking the first steps to create positive change in the world. Don't worry, we have resources to show you how to make your outreach efforts a success!

You're Officially Certified!

Once you and your chapter members complete all the steps to become a PPE chapter, you will receive a certificate of recognition from DHMIC at the Annual PPE Learning Collaborative!
