

ADOLESCENT WELL-VISIT

★ RACE/ETHNICITY DISPARITIES

According to the 2020/2021 National Survey of Children's Health, 28.2% of Delaware adolescents, ages 12 through 17, did not obtain a preventive medical visit last year.

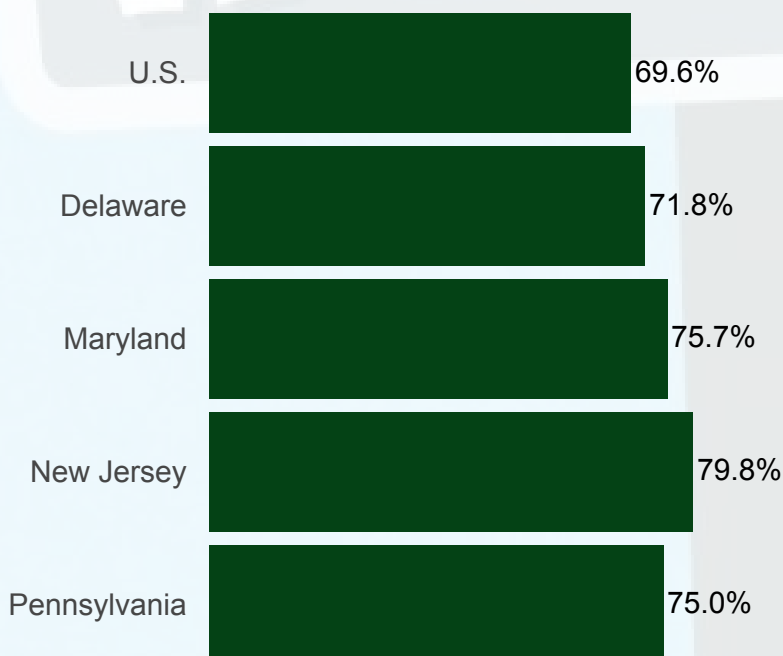

This is slightly lower compared to the national average of 30.4% of adolescents who did not obtain a preventive medical visit.

▲ HOW ARE WE DOING?

According to the 2020/2021 National Survey of Children's Health, 28.2% of Delaware adolescents did not obtain a preventive medical visit last year, which is slightly better than the national average of 30.4%.

👍 DELAWARE'S ACTIVE MEASURES

Increasing the number of adolescents receiving a preventive well-visit annually to support their social, emotional and physical well-being is one of Delaware's currently selected National Performance Measures (NPM) for the upcoming fiscal year.

ADOLESCENT WELL-VISIT

<https://dethrives.com/title-v>

DELAWARE OBJECTIVES

Develop a cross-system partnership and protocols to increase the proportion of adolescents receiving annual preventive services.

Increase the number of adolescents, ages 12 through 17, with a preventive medical visit in the past year.

DELAWARE'S COMMUNITY VOICE

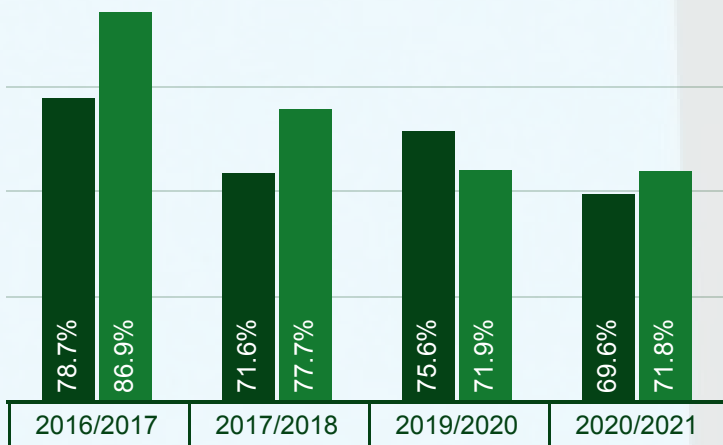

"Most mothers are pleased with the relationship they have with their children's doctors and appreciate helpful referrals to specialists and support groups. However, some feel that their pediatricians do not spend adequate time during office visits."

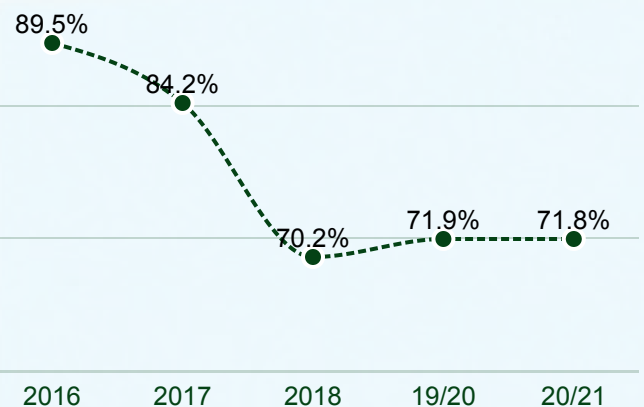

HEALTH DISPARITIES RESULT FROM MULTIPLE FACTORS:

- Poverty
- Environmental Threats
- Inadequate Access to Health Care
- Individual and Behavioral Factors
- Educational Inequalities
